THE EATERS OF OLIVES.

Food for the Poor of Various Lands—A Traveler's Experience.

The extent to which the olive is used varies greatly in different countries. In northern countries it is used chiefly as a relish eaten by itself, or as a sauce, seasoning or stuffing for meats, fowl or game. It is on the tables of the rich what the French call a hors d'oeuvre—that is, a dish which is eaten before the main course. But it is far otherwise with the poor in the south of Europe, to whom it is an important article of diet. In ancient times the poor made an entire meal of bread and olives. It is still the same in some parts of Europe, where a peasant thinks himself prepared for a journey with a piece of bread under his arm and a handful of olives in his pocket. In southern Italy no meal is made without olives. The olive merchants pass regularly at supper time through the poorer quarters of the city.

It is the Spanish habit to eat olives at the end of a meal, but not too many. Three or four are usually thought enough, or if they are very good one may eat a dozen. An Italian author recommends the preserving of Spanish olives—that is, of those grown on Italian soil—but prefers those called St. Francis, which is common at Avon, where it abounds the size of a walnut. It is however, generally agreed among gastronomes that the smaller olives are best for eating. The manner of treatment has, nevertheless, perhaps something to do with the coarse quality of the Spanish olive when found in the peninsula. Olives are preserved in Italy, as elsewhere, in weak lye or lard. They are also brined, stuffed in the Roman manner or dried.

In eastern countries, where the olive grows, the fruit forms still an important article of diet. A traveler relates that he found delicious a meal of eggs, olives and grapes offered him by the monks of the monastery of Mount Libanus. It is traditional in the Catholic church that the monks living in the desert fed principally on olives. Throughout Turkey, Asia Minor, Greece and other countries about the Mediterranean the olive has remained, as in the most ancient times, a substantial article of food and a necessary means of existence to the toiling millions.—Cor.
